IMPREGNABLE E-SECURITY FROM TATA INFOTECH

Computer Networking and the Internet have created great opportunities and offer compelling benefits. Adoption of these technologies is no longer a matter of choice but rather a matter of survival. However, the worrying question is *have we increased our risks?*

The nature of these risks, and the full extent of their consequences is only just being understood. The Information Assets we are creating are dangerously vulnerable. The threats are real.

Dealing with these threats requires technology and more…. Tata Infotech Limited understands what it takes to enable you to secure your business.

Tata Infotech has developed considerable expertise in all aspects of Information System Security through sustained and focussed R&D, as well as by providing practical solutions to its customers.

Tata Infotech brings this expertise to its customers through its

- **Consulting services**
- **Indigenously developed products**
- **Total Security System design and System Integration services.**

A. The consulting offerings include

- Infosec (Information Systems Security) Consulting
- PKI Consulting
- Training.

B. The product offerings – Fortiora, a complete suite of PKI based e-security solutions. It is based on completely indigenously developed strong crypto systems to ensure total safety of all your vital information. The Fortiora product suite comprises of three products. Fortiora DEFT (Data Encryption for Transmission), Fortiora CSAR (Certificate Server Access to Repository) and Fortiora SCOUT (Security Components and Utilities Toolkit).

Fortiora DEFT can be used for secure storage and transmission of all types of data. It also provides the facility for digital signatures.

Fortiora CSAR is a Certification Authority that acts as a trusted third party to generate and manage the digital certificates of all users.

Fortiora SCOUT is targeted specifically at application developers. It consists of a tool kit that they can use for developing secure applications.

C. Total Security System design and System Integration services

Tata Infotech has expertise in providing end-to-end security solutions which are backed by proven Systems Integration Skills in implementing large projects.
